

Fabrication Welders

Ensign Energy Services Inc. seeks self-motivated individuals, with a high standard of manufacturing processes and a good knowledge of all steel fabrication are required. Applicants will also be able to weld using various types of processes. The understanding and ability to assemble mechanical equipment is an asset

Competent in welding techniques such as

- Shielded metal arc welding (SMAW)
- Gas metal arc welding (GMAW) (MIG)
- Flux core arc welding (FCAW)

Familiar with operating

- Manual, semi-automatic, and fully automated welding equipment
- Manual or semi-automatic flame-cutting equipment
- Oxygen arc cutting equipment (arc-air) (AOC)
- Drill presses
- Previously set-up welding machines to fabricate or repair metal parts and products

Skills

- The ideal candidate will be skilled in layout, bending, twisting, embossing and forging of various aluminum & steel shapes.
- Knowledge & experience in the usage of Hebo, Eagle, Air Hammer and Forging machines.
- Adept in mathematics, Mig & Tig welding abilities.
- Must have the ability to create designs in metal from shop drawings supplied and also to layout designs into various pre-measured templates with little to no supervision
